

TDX™ INVENTORY

Inventory is Everything! Everything is Inventory!

□ **On Site Generate**

Today's hazardous waste manager realizes that there are thousands of events that are central to managing waste inventory effectively. From a simple ship in, to a merge of containers into a tank, or a split of waste, do you know "what's in your soup?"

□ **Manage Merges & Splits**

Tracking and managing inventory events have never been easier. ***TDX Inventory*** offers you unlimited capacity with all the tools at your fingertips to chart the history of your own material flow.

□ **Track Constituents**

Customize as many storage areas or levels of storage as you want. Add as many containers as you need. ***Ship in hazardous waste inventory from a manifest or profile - automatically.*** Or generate waste on site.

□ **Manage Backwards**

Then manage your inventory effortlessly. Consolidate waste from multiple containers into one. Split waste from one container into many and accurately track the original constituents. Move multiple containers between storage areas – with a simple **drag and drop**.

□ **Manage Forward**

Split waste stored in the same container and track the waste codes. Create complex **lab packs** with packing slips and detailed reports. Treat your inventory, and then **let TDX create a manifest for outbound shipment - automatically.**

□ **Automatic Manifests**

Schedule future events and look back in time to view inventory throughout the entire treatment, storage or disposal process – just by a simple calendar select. Coupled with a myriad of reports, your management job just became more efficient than ever.

□ **Drag and Drop Inventory**

You have choices. We have answers. Go Further with Terralink.

□ **Pack, Repack, Lab Pack**

Call **207-772-6500** today to see what **TDX** can do for you.
